

TECHNICAL DATASHEET

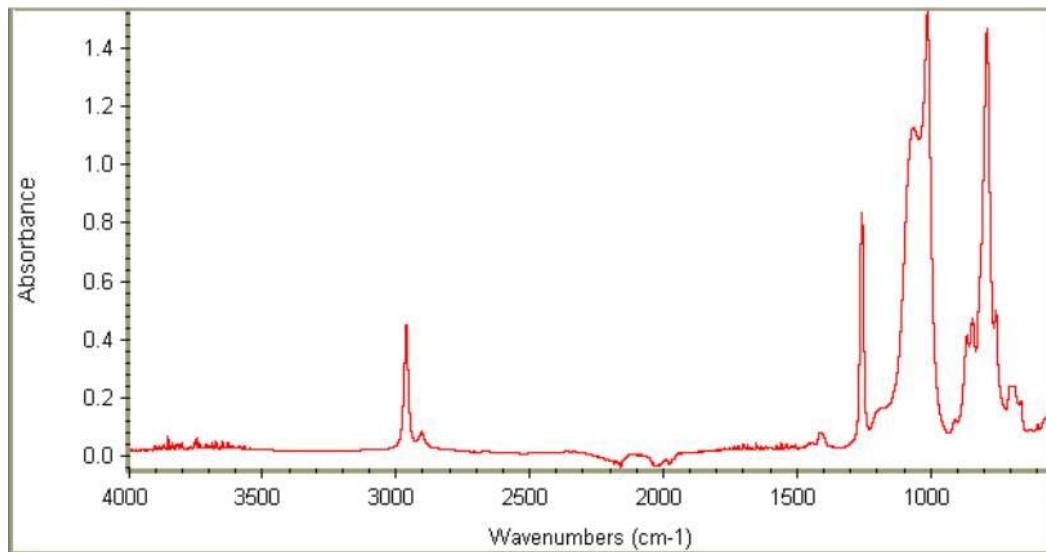

Method Summary:

Fourier Transform - Infrared Spectroscopy, FT-IR, utilizes infrared absorption to identify molecular groups of organic materials.

Test Method and Results:

Nicolet Magna System 550

The Gel-Pak polymer utilized in AD/BD/CD, PF/WF, and VR applications, was analyzed by FT-IR. The following is the absorbance spectrum:

Results Summary:

The Gel-Pak polymer is a polysiloxane based material.

GEL-PAK CONFIDENTIAL
